PLANNING COMMISSION MEETING MINUTES
CITY COUNCIL CHAMBERS
SEPTEMBER 23, 2019
6:00 P.M.**

CALL TO ORDER

ROLL CALL

Commissioners Present: Elizabeth Kelly, Aaron Ochs, Orin Kipp, Colleen Siegfried, and Tom Triplett

Commissioners Absent: None

City Staff Present: Assistant City Administrator/Planner Sara Taylor, City Administrator Adam Bell, and City Engineer John Parotti

APPROVAL OF MINUTES

It was moved by Commissioner Siegfried and seconded by Commissioner Kelly to approve the July 22, 2019 regular meeting minutes. Motion carried 5-0.

PUBLIC HEARINGS

Consider an application submitted by Andersen Corporation for a variance from impervious coverage requirements for a parking lot and stormwater improvement project at 100 4th Avenue North: Commissioner Kelly called on Planner Taylor to present the details of an application submitted by Andersen Corporation for a variance from impervious coverage requirements for a parking lot and stormwater improvement project at 100 4th Ave North. Planner Taylor explained that the Andersen Corporation campus is zoned industrial and guided for industrial use by the Comprehensive Plan. The proposed project involves resurfacing two existing gravel parking areas with a new bituminous surface and installing two rain gardens to infiltrate stormwater runoff. Because Andersen Corporation was developed prior to the adoption of the city's zoning code, much of the plant does not meet current standards, especially in regard to lot coverage requirements. For this reason, Andersen is requesting a variance with impervious coverage to facilitate the project. The north parking area, consisting of 1.4 acres, will be converted from gravel to bituminous surface and the remainder will be converted to vegetated green space to decrease impervious surface and reduce stormwater runoff, resulting in a net of 1.3 acres impervious. The south parking area, consisting of 1.7 acres, will also be converted from gravel to bituminous surface, with an additional 150 square feet to be added to expand a drive lane and improve vehicular safety. Two rain gardens will be constructed near the south parking area, adjacent to the St. Croix River, resulting in a total reduction of .2 acres of impervious surface for the overall project. State statute dictates that a variance shall only be permitted by the Planning Commission when in harmony with the general purposes and intent of the ordinance, consistent with the comprehensive plan, and practical difficulties prevent compliance with the zoning ordinance. In this specific case, staff feels the intent is to use the property in a reasonable manner not permitted by the zoning ordinance; there are circumstances unique to the property; and the variance will not alter the character of the neighborhood. As proposed, the parking lot improvements will not substantially alter the appearance of the site and actually result in increased compliance with current city code, which requires off-street parking areas to be surfaced with asphalt or concrete. The rain gardens will also help to enhance treatment of stormwater runoff, which is a positive improvement over the existing conditions. Notice of tonight's public hearing was published in the Stillwater Gazette and mailed to all property owners within 500 feet. The city did not receive any public comment related to this application.

City Engineer Parotti commented on the application and indicated no major concerns with the submission. He explained that the existing gravel surface is considered an impervious surface but during storm water runoff events, the gravel surface has more detrimental effects than a bituminous surface, as fine sediment infiltrates surrounding drainage areas. For this reason, a bituminous surface would be considered an improvement to the parking facility.

Kirk Hogberg, Andersen Corporation Energy and Environmental Manager, approached the commission and recalled previous mitigation steps the company has taken for stormwater management. This proposed project would reduce the amount of sediment and dust tracked onto the existing paved surfaces by vehicles, making for a cleaner and safer walking surface for employees, as well as reducing sediment stormwater runoff.

Commissioner Kipp confirmed the surface would be paved in bituminous asphalt versus concrete. Some discussion ensued on potential future improvements to the area near the south parking lot and public boat launch. Planner Taylor briefly discussed the city's proposed Land and Water Legacy project, which includes acquisition of 11 contiguous acres along the St. Croix River adjacent to the Andersen property. Commissioner Ochs verified that the new parking surface would still comply with handicap parking stalls requirements.

Commissioner Kelly opened the floor to public comments. There was no public comment on the proposed variance and so it was moved by Commissioner Triplett and seconded by Commissioner Kipp to close the public hearing. Motion carried 5-0.

It was moved by Commissioner Kelly and seconded by Commissioner Siegfried to recommend the City Council approve an application submitted by Andersen Corporation for a variance from impervious coverage requirements for a parking lot and stormwater improvement project at 100 4th Avenue North. Approval is subject to findings of fact and conditions listed in the staff report and presented at this meeting. Motion carried 4-0 with Commissioner Ochs abstaining.
